SMART CHIC

 **GIESSE**

SMART BY DESIGN
CONCEALED BY CHOICE

GIESSE SMART CHIC

The window automation platform, designed around a compact, concealed actuator integrated with Giesse C.H.I.C. accessories, combines mechanics, electronics and software into a single system.

Minimal dimensions

The smallest actuator on the market measures **just 17x25 mm**, including the motor, electronics and gears, and fits completely within the profile.

A single motor

It opens, closes and secures the window by operating the perimeter hardware.

Installer App

The mobile app guides installers through the configuration and testing process, simplifying every stage of the work.

Via Bridge

Smart Home / Smart Building ready

Easy integration with smart platforms in residential and commercial settings.

Via Bridge

GIESSE SMART CHIC PRO version

A comprehensive ecosystem for professionals, including the Smart CHIC compact actuator and the Smart Bridge, which enables the use of the installer app and connection to external home automation systems.

Complete the solution with C.H.I.C. concealed hinges and other Giesse tilt-and-turn window accessories

Choosing the right solution

The two versions are designed to meet different needs.

PRO version

Recommended if the installer and system owner want a guided, reliable, and ready-to-use solution.

Standard case applications

Commercial buildings requiring controlled natural ventilation

Residential or mixed-use projects that require ease of installation and maintenance

Projects in which the window system must be managed and monitored over time

OPEN version

Ideal for projects with dedicated integration expertise and an existing building automation infrastructure.

Standard case applications

Smart building with fully centralized automation

Projects managed by system integrators or BMS specialists

Installations where the customer prefers to leave the decision-making to the building management system
